

# **Inland Ontario Lakes Designated for Lake Trout Management**

**May 2006**

## Statement of Environmental Values

The Ministry of Natural Resources (MNR) is responsible for managing Ontario's natural resources in accordance with the statutes it administers. As the province's lead conservation agency, the Ministry is the steward of provincial parks, natural heritage areas, forests, fisheries, wildlife, aggregates, fuel minerals, and Crown lands and waters that make up 87% of Ontario.

In 1994 the MNR finalized its Statement of Environmental Values (SEV) under the *Environmental Bill of Rights* (EBR). The SEV is a document that describes how the purposes of the EBR are to be considered whenever decisions that might significantly affect the environment are made in the Ministry. During the development of the report "*Inland Ontario Lakes Designated for Lake Trout Management*", the Ministry has considered its Statement of Environmental Values. This document is intended to reflect the direction set out in the SEV and to further the objectives of managing our resources on a sustainable basis.

## **Abstract**

Lake trout lakes are rare. Only about one percent of Ontario's lakes contain lake trout, but this represents 20-25% of all lake trout lakes in the world. The province, therefore, has a great responsibility to manage them wisely. Recent OMNR efforts to develop a coordinated strategy to protect lake trout populations in Ontario requires a comprehensive list of lake trout lakes currently designated for management. This report lists the 2283 inland Ontario lakes (exclusive of the Great Lakes) that are currently designated for lake trout management.

The list includes 2098 lakes that are managed for naturally reproducing populations ('Natural' lakes) and 185 lakes that are managed for put-grow-take stocking ('P-G-T' lakes). 'Natural' lakes include those lakes that may have lost populations but have been identified for rehabilitation. 'P-G-T' lakes are managed to provide recreational fishing opportunities and/or to direct angling effort away from more sensitive 'Natural' lakes. Lakes are classified as 'Natural' or 'P-G-T' because, in some cases, OMNR policies or guidelines may be applied differently depending on the designation, in other cases policies or guidelines may be applied to both categories of lake trout lakes in a similar manner. Individual lake trout lakes are listed alphabetically in tables organized by OMNR Administrative Regions.

Most lakes managed for lake trout will have been identified previously, in other resource management plans. This list supersedes previously published lists and will be subject to revision from time to time, as updated scientific assessment and inventory data become available. Subsequent revisions will be posted on the EBR Registry for public notice and comment.

More detailed information on individual lakes may be available from local OMNR offices.

## Résumé

Les lacs à touladi sont rares. On ne trouve le touladi que dans 1 p. 100 des lacs de l'Ontario, mais cela représente de 20 à 25 p. 100 des lacs à touladi du monde entier, d'où la grande responsabilité qui incombe à la province de gérer l'espèce judicieusement. Les mesures prises récemment par le MRN pour concevoir une stratégie coordonnée afin de protéger les populations du touladi en Ontario nécessitent une liste détaillée des lacs à touladi devant être gérés. Le présent rapport dresse la liste de 2 283 lacs intérieurs de l'Ontario (tous les lacs sauf les Grands Lacs) où le touladi doit être géré.

La liste comprend 2 098 lacs qui sont gérés pour créer des populations de touladis capables de se reproduire naturellement (les lacs dits « naturels ») et 185 lacs dont la gestion repose sur l'empoissonnement (les lacs dits « empoisonnés »). Les lacs naturels comprennent ceux dont les populations de touladis auraient peut-être disparu et pourraient être reconstituées. Les lacs empoisonnés sont gérés pour fournir des possibilités de pêche sportive ou éviter d'exposer à la pêche les lacs naturels, qui sont plus fragiles que les lacs empoisonnés. Les lacs sont classés « naturels » ou « empoisonnés » parce que les politiques et directives du MRN peuvent être appliquées différemment en fonction de la catégorie des lacs, ou être appliquées de la même façon pour les deux catégories. Les lacs à touladi sont notés par ordre alphabétique dans des tableaux. Ceux-ci sont établis selon les régions administratives du MRN.

La plupart des lacs à touladi qui sont gérés figurent déjà dans d'autres plans de gestion des ressources. La présente liste remplace les listes publiées auparavant et sera révisée de temps à autre, lorsque seront actualisées les données associées aux évaluations scientifiques et au dénombrement des populations du touladi. Les révisions seront mises au registre de la *Charte des droits environnementaux*, pour que le public puisse les examiner et communiquer des points de vue.

Il se peut que les bureaux locaux du MRN aient de plus amples renseignements sur des lacs en particulier.

## **Introduction**

The lake trout is the only major, indigenous sport fish species in Ontario that is adapted to oligotrophic lakes (i.e. lakes with low levels of nutrients, high dissolved oxygen levels, and typically deep areas with very cold water). Its slow growth, late maturity, low reproductive potential and slow replacement rate make it susceptible to a variety of stresses. It is an important component of Ontario's rich biodiversity, because of the unique character of the species and the unique gene pools of many of its individual stocks.

Because the lake trout is a sensitive species that is adapted to a narrow range of environmental conditions, it is an excellent indicator of the health of fragile aquatic ecosystems.

Lake trout lakes are rare. Only about one percent of Ontario's lakes (i.e. ~ 2,300) contain lake trout, but this represents 20-25% of all lake trout lakes in the world. The province, therefore, has a great responsibility to manage them wisely.

The lake trout is an important fishery resource in Ontario. It is a preferred species among many anglers, both resident and non-resident, and provides a diversity of fishing opportunities.

There has been a general decline in both the quality of the sport fishery for lake trout and in lake trout habitat in many lakes. Lake trout, and lake trout lakes, are particularly vulnerable to the impacts of human activities, including exploitation, enrichment from cottage septic systems, acidification, species introductions, and habitat destruction. Because of their high sensitivity to disturbance, special protection is required for these lakes and their lake trout populations. Approximately 5% of the province's lake trout populations have already become extinct; 43% of the extinct populations were in southeastern Ontario (Martin and Olver 1976; OMNR 1990).

## **Lake Trout Lakes in Ontario**

Martin and Olver (1976) documented the (at the time) known distribution and characteristics of 2000 inland lake trout lakes (exclusive of the Great Lakes) in Ontario. This total included 1709 native populations, 195 introduced populations, 96 populations of unknown origin and 74 extinct populations. They recognized that additional populations would likely be found (especially in northwestern Ontario) as additional surveys were conducted.

During the Lake Trout Community Synthesis exercise, Martin and Olver's (1976) survey of lake trout lakes was updated and included an evaluation of the likely status of each lake trout population provided by local resource managers (OMNR 1990). The updated list totaled 2318 lake trout lakes, of which 1827 were identified as native populations, 222 introduced populations, 83 populations of unknown origin, 122 extinct or lost populations, and 64 lakes with a population status of 'other' (OMNR 1990).

More recently, Gunn et al. (2004) used 1998 resource management agency data (from Ontario, Quebec, Minnesota, and New York) to update locations, surface area, maximum and mean depths, conductivity and secchi depth of lake trout lakes across the Boreal Shield. They provided data for 2255 Ontario lake trout lakes (excluding lakes > 10,000 ha) and acknowledged that at the time of publication they lacked locational data for approximately 100 additional Ontario lake trout lakes.

While these previous efforts have been valuable in characterizing Ontario's lake trout resource, the resulting lists include lakes which may have supported lake trout populations at one time, but are no longer being actively managed for lake trout. Recent efforts to develop a coordinated strategy to protect lake trout populations in Ontario requires a comprehensive list of lake trout lakes currently designated for management.

## Lakes Designated for Lake Trout Management

This report lists the 2283 inland Ontario lakes (exclusive of the Great Lakes) that are currently designated for lake trout management.

These lakes include 2098 lakes that are managed for naturally reproducing populations ('Natural' lakes) and 185 lakes that are managed for put-grow-take stocking ('P-G-T' lakes). 'Natural' lakes include those lakes that may have lost populations but have been identified for rehabilitation. For example, restoration efforts are currently underway on previously acid damaged lakes in the Sudbury area. These lakes lost their lake trout populations due to acidification but recent water chemistry improvements have allowed the reintroduction of lake trout in order to reestablish viable populations. 'P-G-T' lakes are managed to provide recreational fishing opportunities and/or to direct angling effort away from more sensitive 'Natural' lakes. Table 1 provides a summary of 'Natural' & 'P-G-T' lakes by OMNR Administrative Regions and Districts.

Individual lake trout lakes are listed alphabetically in tables organized by OMNR Administrative Regions. 'Natural' and 'Put-Grow-Take' lakes for OMNR Southern Region are listed in Tables 2 and 3, respectively. OMNR Northeast Region 'Natural' and 'Put-Grow-Take' lake trout lakes are listed in Tables 4 and 5, respectively. 'Natural' lake trout lakes in OMNR Northwest Region are listed in Table 6. There are currently no 'Put-Grow-Take' lake trout lakes in Northwest Region.

The distribution of lake trout lakes across each of the three Administrative Regions is illustrated in Figures 1, 2, and 3.

Lakes are classified as 'Natural' or 'P-G-T' because, in some cases, OMNR policies or guidelines may be applied differently depending on the designation (eg. sport fishing regulations are generally less restrictive on P-G-T lakes; adjacent land management or land use policies may differ according to designation) In other cases, policies or guidelines may be applied to 'Natural' and 'P-G-T' lakes in a similar manner (eg. the application of a dissolved oxygen criterion for the protection of lake trout habitat; the application of timber management guidelines to protect lake trout habitat (OMNR 1988)).

In most cases, lakes managed for lake trout will have been identified previously in either local resource management plans (e.g. District Land Use Guidelines, District Fisheries Management Plans) or regional resource management plans (e.g. *Inland Lake Trout Management in Southeastern Ontario*, OMOE and OMNR 1993). However, since the publication of most of these plans, there have been lakes for which the fisheries role has changed, usually as a result of more recent inventory or assessment data.

This list of 2283 lake trout lakes has been reviewed by local OMNR fisheries management staff and supersedes previously published lists (including lists in the District Fisheries Management Plans). The list excludes lakes which may have been listed as lake trout lakes at one time, but which are no longer managed for lake trout. It includes lakes which may have been absent from previous lists, but for which recent information has confirmed the presence of lake trout populations.

This list will be subject to revision from time to time, as updated scientific assessment and inventory data become available. Subsequent revisions to the list of designated lake trout lakes will be posted on the EBR Registry for public notice and comment.

More detailed information on individual lakes may be available from local OMNR offices.

Table 1. Inland Ontario lakes managed for lake trout by the OMNR. Natural lakes are those lakes that have been identified as being managed for naturally reproducing populations (including lakes that have been identified for rehabilitation). Put-Grow-Take lakes are those lakes that have been identified as being managed for put-grow-take stocking to support recreational angling opportunities.

Nolan		Thunder Bay	48° 45' 16"	88° 42' 44"
Nora		Dryden	49° 12' 18"	91° 50' 35"
North		Thunder Bay	48° 07' 17"	90° 31' 45"
North Arabi		Dryden	49° 34' 34"	90° 50' 04"
North Mawn		Dryden	49° 35' 41"	90° 25' 12"
North Trout		Red Lake	52° 54' 31"	93° 43' 14"
North Whalen		Thunder Bay	50° 04' 26"	89° 36' 02"
Northern Light		Thunder Bay	48° 15' 06"	90° 40' 45"
Northwind		Nipigon	49° 52' 00"	87° 57' 00"
Norway		Fort Frances	49° 04' 38"	91° 16' 16"
Notellum		Kenora	50° 26' 25"	94° 02' 12"
Noxheiatik		Dryden	49° 26' 39"	92° 25' 56"
Nydia		Fort Frances	48° 43' 42"	91° 04' 33"
Nym		Fort Frances	48° 41' 56"	91° 27' 28"
Obonga		Thunder Bay	49° 58' 54"	89° 18' 32"
Ojala		Thunder Bay	48° 33' 00"	90° 34' 00"
Olifaunt		Fort Frances	48° 32' 05"	91° 27' 02"
Olive		Red Lake	51° 19' 57"	94° 17' 35"
Oliver		Thunder Bay	48° 15' 52"	89° 35' 13"
Onamakawash		Thunder Bay	50° 18' 20"	89° 36' 10"
One Island (Beaton)		Kenora	50° 11' 32"	93° 24' 09"
Onepine		Red Lake	51° 48' 00"	94° 37' 54"
Onnie		Red Lake	50° 56' 01"	94° 16' 01"
Opichuan		Nipigon	51° 14' 09"	87° 47' 09"
Optic		Red Lake	50° 55' 48"	94° 31' 11"
O'Sullivan		Nipigon	50° 25' 43"	87° 03' 13"
Other Man		Fort Frances	48° 11' 35"	91° 09' 03"
Otisse		Nipigon	48° 52' 58"	87° 08' 56"
Otterskin		Kenora	49° 14' 12"	93° 38' 26"
Otukamamoan (Trout)		Fort Frances	48° 57' 35"	92° 51' 31"
Owl		Fort Frances	48° 40' 00"	91° 43' 19"
Owl		Nipigon	48° 59' 42"	87° 00' 49"
Paddy		Dryden	49° 15' 58"	92° 02' 03"
Page		Red Lake	51° 01' 35"	94° 21' 47"
Paguchi (Trout)		Dryden	49° 34' 05"	91° 32' 58"
Paint		Nipigon	49° 43' 51"	87° 41' 39"
Pangloss		Thunder Bay	49° 45' 48"	89° 16' 40"
Panorama		Fort Frances	48° 57' 40"	93° 49' 39"
Passover		Dryden	49° 31' 03"	93° 14' 22"
Patty		Kenora	50° 03' 16"	93° 57' 35"
Paull		Red Lake	50° 46' 09"	94° 39' 13"
Peak		Dryden	49° 29' 30"	92° 38' 08"
Pekagoning		Fort Frances	49° 08' 41"	92° 11' 31"
Penassi		Dryden	49° 57' 01"	91° 11' 00"
Penassi		Fort Frances	49° 18' 05"	93° 09' 11"
Pennock Lake West		Thunder Bay	48° 21' 25"	89° 55' 36"
Perch		Kenora	50° 04' 26"	94° 31' 56"
Pete		Thunder Bay	48° 22' 15"	89° 52' 37"
Peterson		Red Lake	51° 00' 27"	94° 20' 26"
Pettit		Fort Frances	48° 57' 15"	92° 16' 16"
Pic		Kenora	50° 04' 36"	94° 12' 01"
Pickerel		Fort Frances	48° 37' 42"	91° 26' 04"
Pidlubney (ELA L. 634)		Kenora	49° 39' 41"	93° 48' 44"
Pillar		Thunder Bay	50° 12' 00"	89° 08' 00"

Table 6. (cont'd) Natural Lake Trout Lakes in Northwest Region, OMNR.

<b>Lake Name</b>	<b>Geographic Township</b>	<b>OMNR District</b>	<b>Latitude (dd mm ss)</b>	<b>Longitude (dd mm ss)</b>
Pineneedle		Red Lake	50° 39' 55"	94° 17' 15"
Pipestone		Fort Frances	49° 05' 47"	93° 33' 08"
Plough		Fort Frances	48° 08' 46"	91° 10' 56"
Plummes				
(East Plummes)		Thunder Bay	48° 22' 05"	90° 43' 27"
Pluto (Mc Gonigel)		Dryden	49° 39' 48"	91° 39' 14"
Poacher		Fort Frances	48° 05' 11"	91° 24' 14"
Pond (Trapper)		Fort Frances	48° 17' 53"	91° 53' 58"
Ponto		Fort Frances	49° 15' 36"	92° 50' 46"
Poohbah		Fort Frances	48° 22' 44"	91° 40' 58"
Popeye		Dryden	49° 20' 03"	91° 52' 14"
Populus		Kenora	49° 30' 22"	93° 36' 35"
Porcus (ELA L. 374)		Kenora	49° 43' 30"	93° 50' 43"
